Art Unit: 2645

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, IV, V, VI, VII and VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I to VIII are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because the disclosure teaches different ways for providing personalized user services and as exemplified by Invention I, a user is given personalized services based on access rights to folder services (Page 1, lines 25-27 and Page 16, lines 1-3). In Inventions II-VIII, personalized services through folders are not required even though personalized communications are provided to a customer. In invention I the personalization is governed by whether a user is only a read-only or owner of the folders.

Similarly, the disclosure teaches and as exemplified by Inventions II-VIII, different ways of providing personalization services and which are independent of each other.

Invention II is governed by where information is flowing and updating information i.e. synchronization of folder information (Page 27, lines 7-17).

Inventions III and IV, are governed by call screening, verifying contacts and setting up calls to contacts (Page 19, lines 18-26). The teaching shows that invention III is different from Invention IV in the way calls are setup.

Art Unit: 2645

Inventions V and VI are governed by the use of calendar information (Page 32, lines 10-24 and Page 34, lines 21-27). The teachings show how calendaring information is used for different functions.

Inventions VII and VIII are governed by profile information (Page 37, lines 10-16 and Page 38, lines 1-8). The teachings show how a user profile is used for providing user services (Invention VII) and the administration of user profiles (Invention VIII).

Each of the inventions provide personalized services based on their respective subject matter and are, therefore, distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and subject matter, the search required for each invention is not required for the other. Therefore, restriction for examination purposes as indicated above is proper. See MPEP 806.05 (d).

4. A telephone call was made to Applicants representative, **Alex L. YIP**, Reg. No. 34,759, to request an oral election to the above restriction requirement. No election was made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 2645

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. A shortened statutory period for response to this action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of the application (see 35 USC 133 and MPEP 710.02, 710.02(b)).

8. Any response to this action should be mailed to:
